Mission

The Centre for Information Communication Technology and Law (CICTL) aims to be a centre for excellence in generating and disseminating the knowledge concerning the interrelationship between technology and law across the globe.

Objectives

- To explore the opportunities and challenges in the information society and provide legal and policy solutions
- To serve as a platform to bring together experts, leaders and researchers from the technical and legal domain
- To undertake, promote and disseminate core law and policy research in the techno-legal field
- To work in collaboration with national and international research centres, global academia, international, governmental and non-governmental organizations and the tech industry
- To offer consultancy services to a variety of sectors including the legal professionals, private industry, non-profit and public agencies in the techno-legal field
