

One Day Training Program on Electronic Evidence

Conducted by

Centre for Information Communication and Technology Law
MAHARASHTRA NATIONAL LAW UNIVERSITY MUMBAI

Why this Course

“It is appallingly awful that technology exceeds our humanity sometimes.”

- Albert Einstein

The advent of Information Communication Technology have changed the way communicate, record or enter into any transaction or agreements, rather most of the things what we do today in any span of life are dependent on technology or done through technology. The use of information communication technology is so rampant that the way in which the records of the documents were kept with respect to any transaction or event were recorded earlier, also changed.

As reliance on Information Communication Technology increases day by day it becomes even more significant to assess the legality and validity of technology assisting and influencing human conduct. Even though use of Information Communication Technology may be ensured with ease for those who know the technology and its nuances, the evidentiary factors cannot be ensured without knowing the law on the point. The end user of the

information communication technology must know the value and process of Electronic Evidence.

Ignorance of law not being an excuse and possibility knowing all such standards by the of professionals working the industry being very less MNLU Mumbai considers its social responsibility to bridge this gap. A step towards bridging this gap is One day training programme on Electronic Evidence. Event shall be organized under Centre for Information Communication and Technology Law.

The event shall be visited by professionals in various industries which shall talk about the procedures and practices to be followed law and other relevant matters for admissibility of electronic evidence.

Programme shall be beneficial for professionals working as lawyers, judges, activists, law students, journalists, freelancers, consultants etc.
